

GOANYWHERE FTP

- Log into GoAnywhere
- Open your browser and type the URL “<http://169.254.166.33:8000/>”
- Provide the credentials and log in.
- Start the FTP service which by default is stopped.
- Navigate to the Services page by selecting Services from the main menu bar, then click Service Manager.
- On the Service Manager page, you'll see a list of GoAnywhere Services. Click on Action next to the FTP Service, and then click Edit
- In the left-hand panel of the FTP Configuration page, select Listener: default under the Server drop down
- Note down the port, it will show the default port which we have provided during installation.
- Click on save and finish
- Click on Action again and select start
- Cross check at dashboard whether service is started or not.

Service	Status	Start Time	Active Sessions
HTTPS(A52/A54)	Stopped		0
FTP	Started	31/8/21 5:53:07 PM	0
FTPS	Stopped		0
SFTP	Stopped		0
GoFast	Stopped		0
Agents	Stopped		0
PeSIT	Stopped		0

Create New User

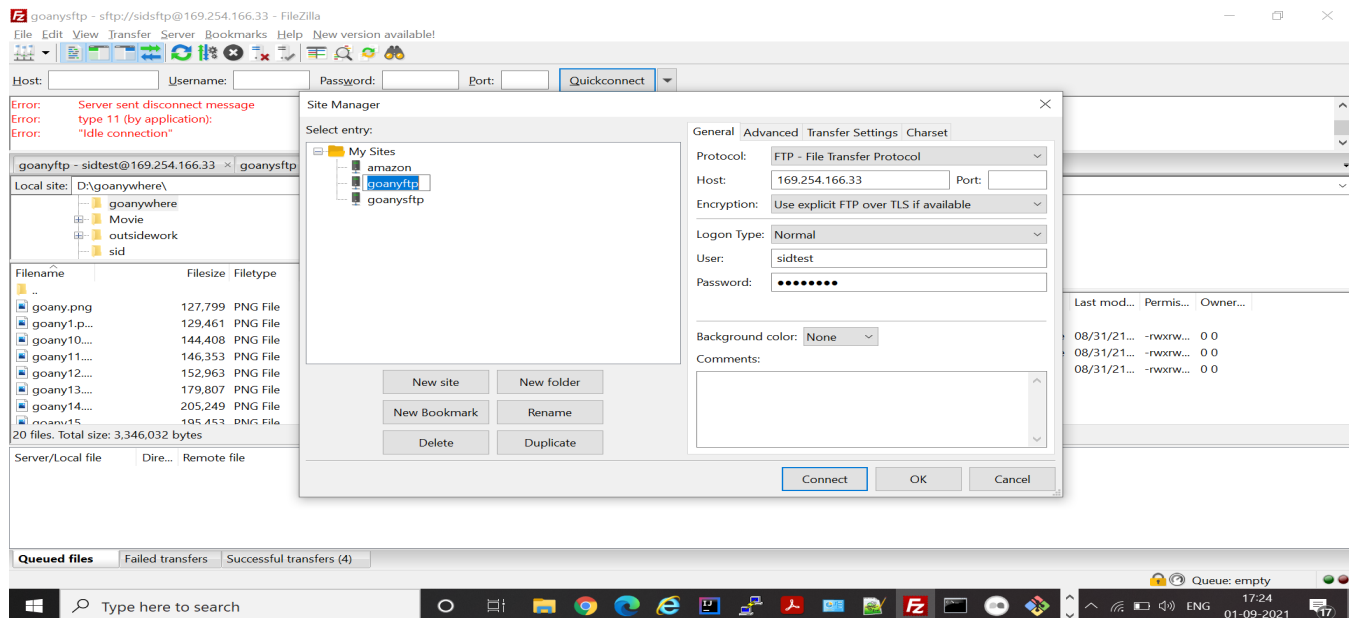

- Navigate to the Web User management page by selecting Users in the main menu bar and clicking Web Users.
- Click Add Web User
- Provide user name
- Provide authentication credentials
- Provide access to the GoAnywhere FTP Feature
- Provide permission to upload files
- Click Save. The Web User's password and home directory will be generated by GoAnywhere and will be displayed at the top of the screen.

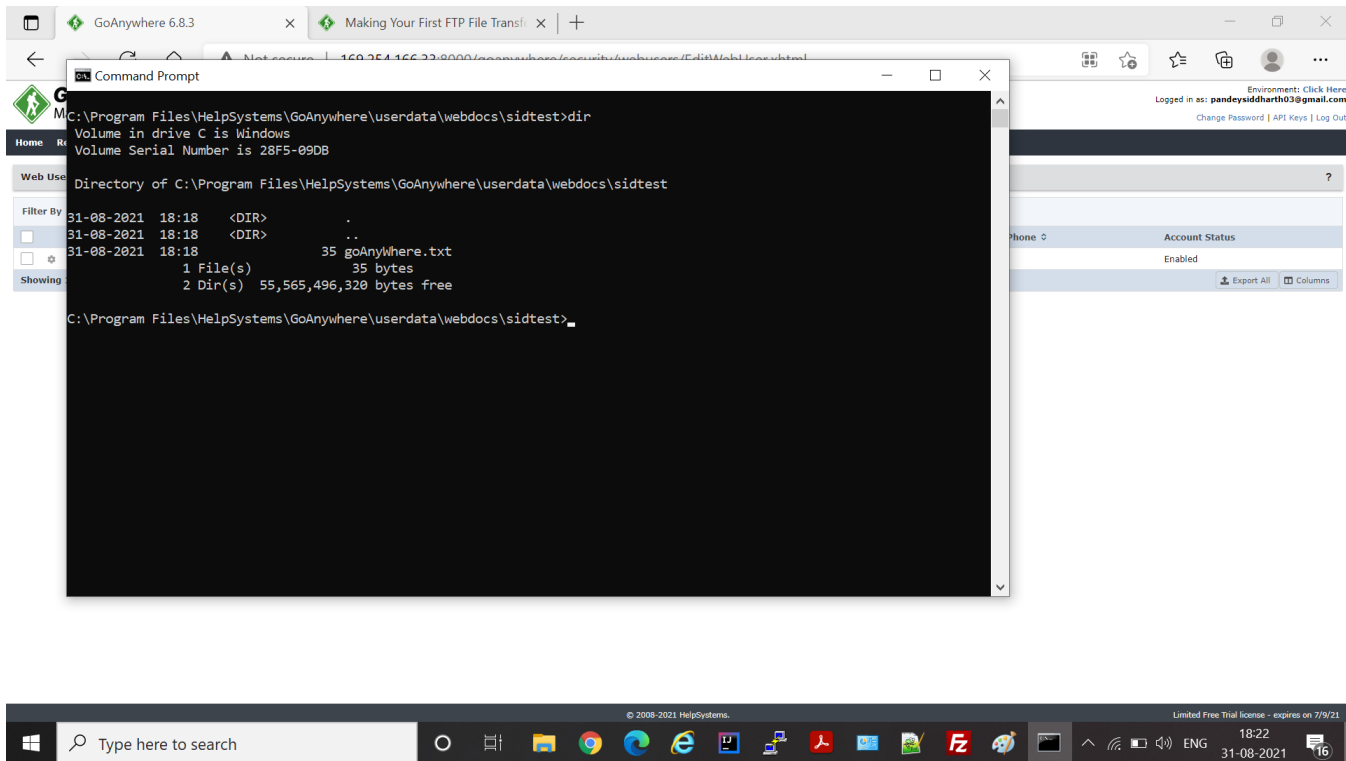

Ready to test the File Transfer

1. Launch FileZilla.
2. Click on **File** and select **Site Manager**.
3. Click **New Site**.
4. On the Site Manager screen, specify values for the following fields:
 - **Host** – the GoAnywhere hostname. The default in this example is the IP address.
 - **Port** – The port assigned to the FTP listener. The default in this example is 21.
 - **Protocol** – Select **FTP – File Transfer Protocol** from the drop-down menu.
 - **Logon Type** – Select **Normal** from the drop-down menu.
 - **User** – Enter the User Name of the GoAnywhere Web User.

- **Password** – Enter the password specified for that Web User.
5. Click **Connect**.
 6. Upload a file using FileZilla.
 7. When the upload is successful, navigate to GoAnywhere's [install directory]\userdata\webdocs\[user name] folder and verify you can access the file from the system.

```
Command Prompt
C:\Program Files\HelpSystems\GoAnywhere\userdata\webdocs\sidtest>dir
Volume in drive C is Windows
Volume Serial Number is 28F5-09DB
