Mendelson

Mendelson AS2 is a JAVA-based open source EDIINT AS2 solution. Logging- and configuration GUI (SWING), async & sync MDN, signatures, encryption, SSL, web interface, pluggable into any servlet container, TP manager, compression, optional profiles: MA, FN

Features

- Logging- and configuration GUI (SWING)
- AS2 1.2 protocol standard
- Async & sync MDN
- Signatures (MD5, SHA-1, SHA-2,SHA-3)
- RSASSA-PSS signature schema
- SSLv3/TLS (v1.0, v1.1,v1.2, v1.3)
- Web interface
- Encryption
- RSAES OAEP (AES-128, AES-192, AES-256) encryption
- Pluggable into any servlet container
- Data compression
- Message post processing (scripting on receipt, sent)
- Email event notification
- Optional AS2 profile MA (Multiple Attachments)
- Optional AS2 profile FN (Filename Preservation)
- Optional AS2 profile SHA-2 (SHA-256, SHA-384, SHA-512)
- Works fine with SHA-2 signed certificates

Getting Started

- Download the free trial version setup.
- Install by double clicking and accepting the agreement
- Launch desktop mendelson app
- Login as admin by default
- Go to file and select send file to a partner
- Select the file which you want to transfer
- Hit send button on right top corner
- Select the row for which you want to see the transfer logs.
